

ABSTRACT OF THE DISCLOSURE

A data input device including an optically generated image of a data input device. the image including at least one input zone actuatable by an action performed thereon by a user, a sensor operative to sense the action performed on the at least one input zone, and to generate signals in response to the action, and a processor in communication with the sensor operative to process the signals for performing an operation associated with the at least one input zone.

1. A data input device comprising:
 a. an optically generated image of a data input device;
 b. the image including at least one input zone actuatable by an action performed thereon by a user;
 c. a sensor operative to sense the action performed on the at least one input zone, and to generate signals in response to the action;
 d. a processor in communication with the sensor operative to process the signals for performing an operation associated with the at least one input zone.
